Herbert H. Jasper fonds

MG 4253

Accession 2006-0021

Accession 2006-0069

Accession 2006-0136

Accession 2007-0119

1927-1999. - 3.5 m of textual records and other materials, including

- 218 photographs
- 527 scientific illustrations (printed on photo paper)
- 76 - 35mm slides
- 37 glass lantern slides
- 8 film reels
- 2 audio reels
- 22 artifacts
- 32 medals
- 52 certificates

Biographical Sketch

Herbert Henri Jasper was born on July 27, 1906 in La Grande, Oregon, U.S.A. He began his university education studying philosophy and psychology, receiving his B.A. at Reed College in Portland, Oregon in 1927, and his M.A. at the University of Oregon in Eugene in 1929. With a burgeoning interest in the human brain in relation to the mind and behaviour, Jasper completed his Ph.D. in psychology at the University of Iowa in 1931. At this time he married Constance Cleaver, with whom he had a daughter, Marilyn. His thesis work from Iowa was recognized by an appointment as National Research Council Foreign Fellow, leading to two years of study at the Sorbonne in Paris, from 1931-32, with Alexandre and Andrée Monnier and Louis Lapicque. In 1932, a grant from the Rockefeller Foundation allowed him to establish an EEG laboratory at Brown University in Providence, Rhode Island, where he carried out pioneering EEG work and published the first paper in the United States on the human EEG in *Science* in 1935. During this time he was also a professor in the psychology department. He received his D. és. Sci. from the University of Paris in 1935.

An important development in Jasper's career occurred in 1937, when he met Dr. Wilder Penfield, who had recently established the Montreal Neurological Institute (MNI). The two carried out collaborative work, with Jasper at first commuting from Rhode Island with a portable EEG unit, and moving to Montreal in 1938 upon Penfield's invitation to join the MNI. There, Jasper established a special clinical EEG unit to study epilepsy

and mental illness and led the MNI's neurophysiology and EEG labs from 1939 to 1961; he was also a professor of experimental neurology at McGill University. He enjoyed the lifestyle at the MNI, which in addition to long hours in the lab, included skiing and sailing with Penfield and the other MNI fellows on the weekends. In 1940, he married his second wife Margaret Aileen Goldie, a nurse at the laboratory; they had two children, Stephen and Joan. In order to improve his medical skills with the patients in the EEG Department, Jasper studied medicine at McGill, while concurrently carrying out his research work at the MNI; he received his MDCM from McGill in 1943. He became a Canadian citizen and joined the R.C.A.M.C. in 1943, carrying out wartime research on head injuries and the physiology of air pilot blackouts. One of Jasper's great achievements at the MNI was the monograph written with Wilder Penfield in 1954, *Epilepsy and the Functional Anatomy of the Human Brain*, which became the most popular in the field. In addition to his pioneering work with the EEG, he used microelectrodes to record from single brain cells and synapses, and endeavored to understand the fluctuations in autonomous brain rhythms due to different stages of consciousness and responses to reverberations in the brainstem and thalamic reticular formations.

In 1964, he relocated from the MNI to the Université de Montréal to work with Jean-Pierre Cordeau at the Centre de Recherches en Sciences Neurologiques, funded by the Canadian Medical Research Council. Jasper's research focus here was on experimental neurophysiology by combined neurochemical and microelectrode techniques, and he did key work in the field of neurotransmitters and cortical function. He also taught in the neurophysiology department. Although he retired in 1976, he maintained an active role in the laboratories at both the Université de Montreal and the MNI as an honorary consultant in neuroscience. Following his wife Margaret's death in 1983, he married Mary Lou McDougall.

Over the course of his influential seventy year career in brain research, Jasper was honoured with numerous awards, distinctions, and honorary degrees. These include the Albert Einstein World Science Award from the World Cultural Council, the William G. Lennox Award of the American Epilepsy Society, the Ralph Gerard Prize from the Society for Neuroscience, the McLaughlin Medal from the Royal Society of Canada, the Carl Spencer Lashley Award from the American Philosophical Society, and the FNG Starr Award from the Canadian Medical Association. He was also made an Officer of the Order of Canada in 1972, a Grand Officer of the Ordre National du Québec, and was inducted into the Canadian Medical Hall of Fame in 1995. He received numerous honorary degrees from universities in Canada and overseas, including McGill, Queen's, and the Université de Bordeaux.

Dr. Jasper was an active member of many national and international medical and research organizations, and was one of the founding members of IBRO (the International Brain Research Organization); in 1960 he moved to Paris for one year to become the organization's first Executive Secretary. He was the first president of the American EEG Society, as well as the International Federation of Societies for EEG and Clinical Neurophysiology. He also engaged in extensive publishing and editorial

activities as the founder and editor-in-chief of the International Journal of Electroencephalography and Clinical Neurophysiology. He chaired many committees and traveled worldwide to participate in symposia and conferences. A prolific writer, Jasper published well over 300 works. Herbert Jasper continued to attend conferences and give lectures until his death on March 11, 1999 from sudden cardiac attack at the age of 92. He is widely recognized as one of the most influential neurophysiologists of the twentieth century.

Scope and Content Note

The fonds documents Herbert H. Jasper's research activities at the Montreal Neurological Institute and the Centre de Recherches en Sciences Neurologiques at the Université de Montréal, his active travel and participation in international symposia and research organizations, his correspondence with an international network of researchers and colleagues, as well as his publishing and editorial work. A small amount of the materials also relate to his teaching activities at the Université de Montréal, as well as his personal life. Records include correspondence, conference and symposia materials, publications, research notes, photographs, and awards, including medals, plaques, and certificates. The majority of the materials are from the 1960s to the 1980s. Arrangement of the fonds varies by series, and includes subject, chronological, and alphabetical arrangement.

The series consist of 1) Research; 2) Teaching; 3) Personal; 4) Photographs

Custodial History

The fonds was acquired in four accessions, three directly from Herbert Jasper's wife Mary Lou Jasper (2006-0021, 2006-0036, 2007-0119), and one from Mary Lou Jasper via the Université de Montréal (2006-0069). Accession 2006-0021 was received December 12, 2005, Accession 2006-0069 was received May 15, 2006, and Accession 2007-0119 was received June 28, 2007. All accessions have been merged into 2007-0119.

Languages: Mainly English, some French, a very small amount of German, Japanese, and Russian.

Title: Based on the contents of the fonds.

Access Points: Herbert H. Jasper fonds.

Finding Aid: Box list available.

Access: Open.

1. Research activities – 1927-1999. – 3.1 m of textual records, 527 scientific illustrations, 1 negative, 75 35mm slides, 37 glass lantern slides, 14 artifacts (research instruments), 8 film reels, 2 audio reels.

This series documents Jasper's research activities, primarily from his years at the Centre de Recherches en Sciences Neurologiques at the Université de Montréal, although some material from his years at the Montreal Neurological Institute is included as well.

Files relating to conferences and symposia provide insight into Jasper's research interests over his career, some of the major contributions he made to the field, as well as his extensive involvement in organizing and chairing events. Record types include correspondence, conference proceedings, drafts of papers submitted, and lecture notes. These materials are arranged chronologically by date of conference, 1949-1999 (Container 1, Files 1-79; Container 2, Files 80-129; Container 15, Files 403, 406, 407). The conference and symposia materials also reflect Jasper's international influence in the research community, as well as his wide network of contacts. For example, the file relating to the 1970 International Symposium in Neuroscience in honour of H. H. Jasper contains many letters from internationally-renowned neurophysiologists and researchers (Container 1, File 48); a related item is the signature book from the same event, 1970 (Container 8, File 356).

Professional correspondence files are arranged alphabetically and chronologically within the files, 1938-1999 (Container 3, Files 130-146, 148-170; Container 4, Files 171-180, 182-199). Again, these reflect Jasper's extensive network in the international research community, his research activities, as well as his editorial work. Most of the correspondence is from Jasper's time with the Université de Montréal and his subsequent retirement, however there is some earlier material relating to the Montreal Neurological Institute, specifically correspondence with Wilder Penfield, 1948-1983 (Container 4, Files 179-180), and Ted Rasmussen, 1949-1970 (Container 4, File 186). Jasper also carried out a long correspondence with friends and fellow researchers Ali and André Monnier, 1938-1993 (Container 3, Files 168-170).

Subject files, which are arranged alphabetically, provide information about the many societies and organizations of which Jasper was a member and active participant. Of particular note are the files relating to the International Brain Research Organization (IBRO), which Jasper helped found in 1960. He was the first Executive Secretary of IBRO, and maintained honorary positions with the organization for the rest of his life, 1958-1993 (Container 5, Files 240-242). Also included are files relating to Jasper's publishing and editorial activities for scientific journals. In particular, Jasper was the founding editor and publisher of the EEG Journal; layouts for the first issue, as well as correspondence, are included, 1949-1979 (Container 5, Files 233-234).

Materials relating to Jasper's publications, including drafts of published and unpublished manuscripts, research notes, and correspondence with colleagues and publishers are arranged in a block of files, 1929-1997 (Container 5, Files 280-292; Container 6, Files

293-332; Container 7, Files 333-341; Container 15, Files 400-401). A comprehensive list of Jasper's publications is available, 1929-1991 (Container 5, File 280). Reprints of Jasper's published materials up to 1977 are bound in four volumes, 1929-1977 (Container 7, Files 337-340); reprints of later publications are also available, 1979-1995 (Container 7, File 341). His army medical research, carried out during his service in WWII is collected in two volumes, 1942-1947 (Container 6, Files 329-330); publications carried out on a grant from the Medical Research Council of Canada are also collected, 1967-1972 (Container 7, File 336). There are also a number of drafts of unpublished manuscripts, including those related to learning and consciousness, 1951 (Container 6, Files 310, 312, 315, and 317), and drafts of an autobiographical piece, 1996 (Container 15, Files 400-401). Many files contain scientific illustrations and EEG recordings used in Jasper's publications, 1951-1986 (Container 1, Files 7, 9, 12, 17, 19, and 20; Container 2, Files 101, 104, 105, 122, 124, 126, and 127; Container 3, File 163; Container 4, Files 203 and 216; Container 5, File 261; Container 6, Files, 294, 297, 299, 300, 307, 309, 311, 314, 315, 326, and 328; and Container 8, File 352). Experiment protocol and notes, including human microelectrode and cooling studies, are found in binders, 1966-1968 (Container 6, Files 331-332, and Container 7, Files 333-335).

Also included are eight film reels, labeled as footage from experiments, and two audio reels, one of which is a recording of an EEG experiment, 37 glass lantern slides of EEG tracings and other illustrations, and instruments used for experiments.

2. Teaching – 1966-1975. – 10 cm of textual records.

A small number of files relate to Jasper's teaching activities in the department of Physiology at the Université de Montréal, 1966-1975 (Container 8, Files 342-354). These contain class outlines, exams, and lecture notes. A list of graduate and post-doctoral students supervised by Jasper is also available, 1933-1976 (Container 8, File 348). Some administrative correspondence from the Université de Montréal also relates to Jasper's teaching activities, 1978-1993 (Container 4, File 194).

3. Personal – 1927-1996. – 30 cm of textual records, 32 medals, 52 certificates, 8 plaques and other awards.

This series of personal materials is arranged by subject. These include biographical information and curriculum vitae, 1964-1996 (Container 8, Files 362-366); genealogical information, n.d.-1982 (Container 8, Files 368-369); poems written by his father, Frank Jasper, n.d. (Container 8, File 367), a yearbook from Reed College, 1927 (Container 8, File 357); and university degrees, 1927-1983 (Container 8, Files 358-360, and Container 13, Items 14, 24, 28, 49, and 52). Of particular interest is Jasper's Travel Diary from a 1958 trip to Russia, in which he records many personal reflections on the country and the researchers he meets (Container 8, File 373). Several travel diaries written by Margaret Jasper, spanning the years 1949-1978, also provide information about the family's travels to international conferences and symposia (Container 8, Files 374-382). Also included are official documents, such as citizenship and army papers, passports, leases, property deeds, and wills 1940-1993 (Container 9, Files 384-393,

396, 408-409, 411). Medals, plaques, awards, and certificates of recognition for Jasper's contributions to brain research are also included in this series; medals, 1961-1998 (Container 16); plaques and awards, 1940-1996 (Container 11); and certificates, 1931-1998 (Container 13); documentation of awards, including correspondence and programs from award ceremonies, 1969-1996 (Container 4, Files 205-207; Container 5, Files 219, 228, 229, 237, 250, 253, 255-256, 268, and 279).

Personal correspondence is included in this series; correspondence with family members, especially his sister Clara, circa 1980s-1990s (Container 3, File 147); and personal correspondence with the Penfields, 1944-1946 (Container 4, File 181). It should be noted that much of the correspondence included in the research series also has a personal element to it, since Jasper had close and long-standing friendships with many of his colleagues. Of particular note is the correspondence with Alexandre and Andrée Monnier, which may be considered personal as well as professional, 1938-1993 (Container 3, Files 168-170).

4. Photographs – circa 1900-1997 – 215 photographs, 3 contact sheets, 1 slide

This series is mainly composed of photographs relating to Jasper's professional life, including portraits, group portraits with colleagues, and scenes from symposia, conferences, and award ceremonies. Some personal photographs, including portraits of family members, and scenes from ski outings and travel, are included as well (Container 10).

71	April 27, 1976 - American Academy of Neurology, Toronto - <i>"New Concepts in Generalized Epilepsy"</i>	1976	1976	1	1	printed materials
72	June 23-26, 1976 - XI Congress of Neurological Sciences, Winnipeg - <i>"Physiology of Epilepsy"</i>	1976	1976	1	1	
73	October 29, 1976 - Penfield Memorial Meeting - <i>"The Centrencephalic System"</i>	1976	1976	1	1	
74	November 7, 1976 - Society for Neuroscience Meeting, Toronto - <i>"Introduction to Prof. Patrick L. McGeer"</i>	1976	1976	1	1	
75		1977	1977	1	1	
76	June 9, 1977 - Colloquium, Western University, London, ON - <i>"Importance of Changing Concepts of Functional Localization"</i>	1977	1977	1	1	
77	July 12-13, 1977 - Int'l Symposium on Abnormal Neuronal Discharges, Monaco - <i>"Possible Ionic Mechanisms for Rhythmic Activity & Bursting in Nerve Cells"</i>	1976	1977	1	1	
78	September 24-27, 1978 - VIth Int'l Symposium on Parkinson's Disease, Quebec City - <i>"Role of the Cerebral Cortex in Tremor Mechanisms..."</i>	1977	1978	1	1	printed materials
79	March 1-4, 1979 - The Neurobiology of Human Consciousness, Mont Gabriel	1978	1979	1	1	
80	April 29 - May 4, 1979 - NRP Conference on Cerebral Cortex, Woods Hole, Mass. - <i>"Problems of Relating Cellular or Modular Specificity to Cognitive Functions..."</i>	1979	1979	2	2	
81	January 25, 1980 - Canadian Physiological Society, Banff, AB - <i>"The Sarrazin Lecture"</i>	1980	1980	2	2	
82	July 10-12, 1980 - IBRO / UNESCO Symposium in Honour of Prof. G. Moruzzi - <i>"Historical Introduction"</i>	1980	1987	2	2	
83	September 16, 1981 - Rhode Island Medical Centre Lecture - <i>"Progress in Neuroscience Rehabilitation"</i>	1981	1981	2	2	
84	March 22, 1982 - Hughlings Jackson Lecture - <i>"Introduction to Hubel"</i>	1982	1982	2	2	
85	March 1982 - Nobel Laureate Lecture, Portland OR	1982	1982	2	2	
86	March 12-13, 1982 - Western EEG Society, Seattle WA - <i>"Evolution of the Concept of Centrencephalic Epilepsy"</i>	1982	1982	2	2	
87	May 13, 1983 - Association des Neurochirurgiens de la Province de Quebec - <i>"Evolution of the Concept of Centrencephalic Seizures"</i>	1983	1983	2	2	

File	File Title	Year From	Year To	Ctnr	Box	Comments
88	May 16-17, 1983 - Monoamine Innervation of Cerebral Cortex, Montreal	1983	1985	2	2	printed materials
89	November 2-5, 1983 - Neural Mechanisms of Conditioning, Woods Hole - "Session IV, Vertebrate Models"	1982	1983	2	2	
90	December 7-10, 1983 - Basic Mechanisms of the Epilepsies, San Diego, CA - "Opening Address"	1983	1984	2	2	
91	May 16-18, 1984 - Two Hemispheres, One Brain - "Introduction"	1984	1986	2	2	
92	October 11, 1984 - Annual Meeting of the Society for Neuroscience, Anaheim, CA - "The Early Development of Neuroscience in Canada"	1984	1985	2	2	photographs (4)
93	February 7, 1985 - Society for Neuroscience, Grass Lecture, Albuquerque, New Mexico - "The Evolution of Views on Basic Mechanisms of the Epilepsies"	1984	1985	2	2	
94	February 8, 1985 - Society for Neuroscience, Albuquerque, New Mexico - "Evolution of the Concept of Centrencephalic Seizures"	1984	1990	2	2	
95	March 29, 1985 - Neuro-Education Center Conference, Royal Oak, Michigan - "Plasticity in Neuronal Development & Regeneration in the Brain"	1984	1986	2	2	printed materials
96	June 4, 1985 - Royal Society Meeting, Montreal, McLaughlin Medal - "Changing Patterns of Brain Research"	1985	1985	2	2	
97	October 20-25, 1985 - Society for Neuroscience Annual Meeting, Dallas, TX - "Introduction"	1985	1985	2	2	
98	November 15, 1985 - Donald Hebb Memorial Service, Redpath Hall	1985	1985	2	2	
99	February 20-24, 1986 - Surgical Treatment of Epilepsy, Palm Desert, CA - "Foreword"	1985	1986	2	2	
100	July 8-12, 1986 - Cellular Mechanisms of Conditioning & Behavioral Plasticity, Seattle, WA - "Introduction"	1986	1986	2	2	
101	July 8-12, 1986 - Cellular Mechanisms of Conditioning & Behavioral Plasticity, Seattle, WA - "Conditioning & Habituation of the Arousal Response: Historical Perspective"	1986	1986	2	2	photographs (10 - illustrations and figures)
102	July 21-23, 1986 - From Molecules to Mind, 80th Birthday Symposium	1986	1986	2	2	printed materials
103	April 8-9, 1988 - Symposium on Epilepsy, Robert Dow, Portland, OR - "Evolution of the Conception of Centrencephalic Seizures"	1987	1988	2	2	photograph (1 - group portrait)
104	June 11-13, 1988 - Generalized Epilepsy, Montreal - "Historical Introduction"	1988	1989	2	2	printed materials, photographs (6 - illustrations and figures)
105	October 9-12, 1988 - Workshop on Neurotransmitters in Epilepsy, WONIEP IV, Stresa, Italy - "Early Efforts to find Neurochemical Mechanisms in Epilepsy"	1988	1988	2	2	photographs (4 - illustrations and figures)
106	October 20-22, 1988 - University of Iowa Psychology Centennial Celebration - Discussion Groups	1987	1988	2	2	
107	January 26-27, 1989 - 50th Anniversary of the Dep't of EEG, MNI - "Historical Introduction"	1989	1990	2	2	printed materials
108	February 19-22, 1990 - University of Western Ontario, London, ON - "Highlights of 60 Years in Neuroscience Research"	1989	1990	2	2
